

Stress Engineering Services received updated certifications after passing our 2017 audit.

Stress Engineering Services, Inc. (SES) in Mason, Ohio is proud to announce that we passed our 2017 quality management system audit. We are now ISO 13485:2016 (medical device) and ISO 9001:2015 (general industry) certified for the design, development and provision of related engineering services. These certifications verify that we have effective product design, development and documentation processes in place which empower and enable us provide safe and effective results.

SES is a full service engineering firm providing analysis, testing, design and failure analysis services to nearly every industry. We have extensive laboratory testing capabilities at our in-house facility. Specifically related to SES's medical practice, we have a broad range of capabilities in device development, systems engineering, packaging, product testing, manufacturing support, material testing, third party reviews and risk management. For more details on each of these services, please visit us online at <http://innovation.stress.com/>.
